

Design Sprint for Scrum Teams

Course Overview

Design Sprint is the answer to bring your organization from a product-centric mindset to a customer-centric mindset. It is a fast-paced 2 to 5-day process that allows a multi-disciplinary team to develop and test new ideas using a set of structure design thinking toolkits.

When Design Sprint works together with Scrum, it brings the design activities into the development process. The Scrum teams would become more design-driven, they can systematically build the feature backlog that solves the right problem.
